

In today's competitive manufacturing environment, procuring high-quality, cost-effective parts helps keep your business profitable. Often, though, the most cost-effective production options - such as sourcing overseas - force you to sacrifice quality and speed to reduce costs.

Our established supply chain, expertise in materials and manufacturability, and responsiveness make it easy for you to realize the cost benefits of outsourced production, while still getting the product quality and availability you need to run your business.

That's why clients work with Panova to source custom and standard rubber, plastic, and metal components.

The Components Supplier that Makes It Easy

Turnkey Supply Chain

- Work with one supplier
- Local oversight (feet on the street)
- Fast turnaround
- Competitive pricing
- Understand and meet quality expectations

Standard, Custom, and Kitted/Assembled Products

- Custom-designed
- Standard Seals
